

WHAT DO THEY EAT?

Some animals and bugs need to feed on blood to survive. They are referred to as hematophagous (hemato=blood, phagous=eat) animals and bugs.

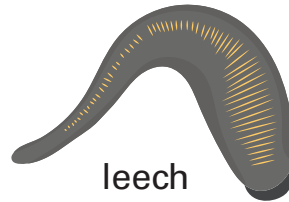

Circle the hematophagous animals and bugs.

deer

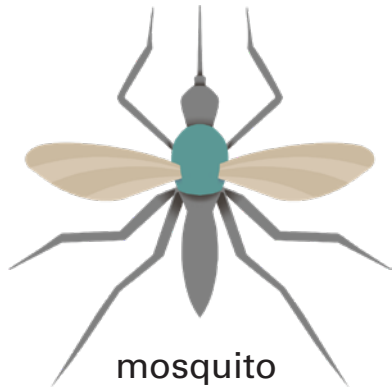

tick

leech

vampire bat

mosquito

fox

mouse

squirrel

WHAT DO THEY EAT?

ANSWERS

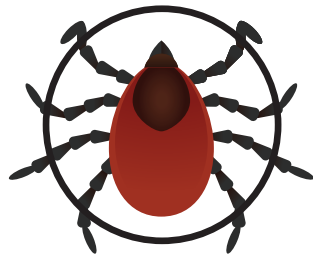

Some animals and bugs need to feed on blood to survive. They are referred to as hematophagous (hemato=blood, phagous=eat) animals and bugs.

Only vampire bats feed on blood, others feed on insects.

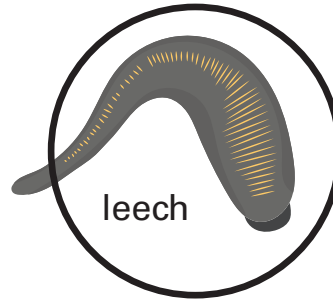

Circle the hematophagous animals and bugs.

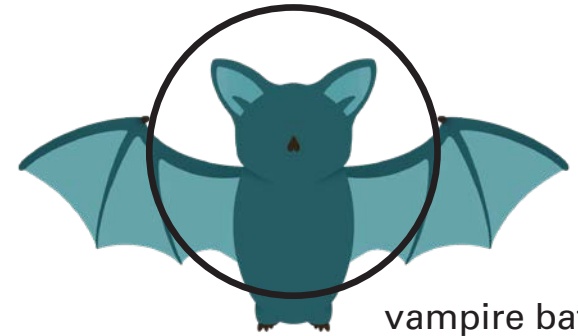

deer

tick

leech

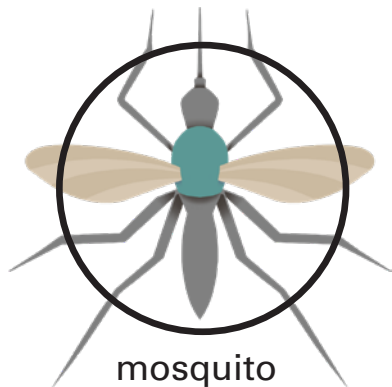

vampire bat

fox

mouse

squirrel

mosquito
